I. Representative service that arranges sample materials

Business background and territories

EII started the representative service from the requests of clients in the following background in Japan, Korea, China and other overseas area where EII had connection with EII's associates since September, 2008.

- To realize actual difference to the sample material
- To make differentiation on own products
- To gain the further market share
- To get the information of competitive market environments

Sample materials were obtained since September, 2008 cover in the following categories.

- Materials related to display
- Materials related to solar cell
- Materials related to Carbon nanotubes (CNT)
- Materials and devices related Inkjet
- Materials related to electrophotography
- Specialty resin
- Specialty coating materials

Actually, EII delivered sample materials described above to Clients

Average number of orders to EII and deliveries to clients counts over 100 per month.

EII recommends clients to try to use service, if clients are interested in EII's Representative service that arranges sample materials.

EII is also providing latest information about available sample materials by EII to clients periodically. This information is limited to the clients who registered contacts at EII.

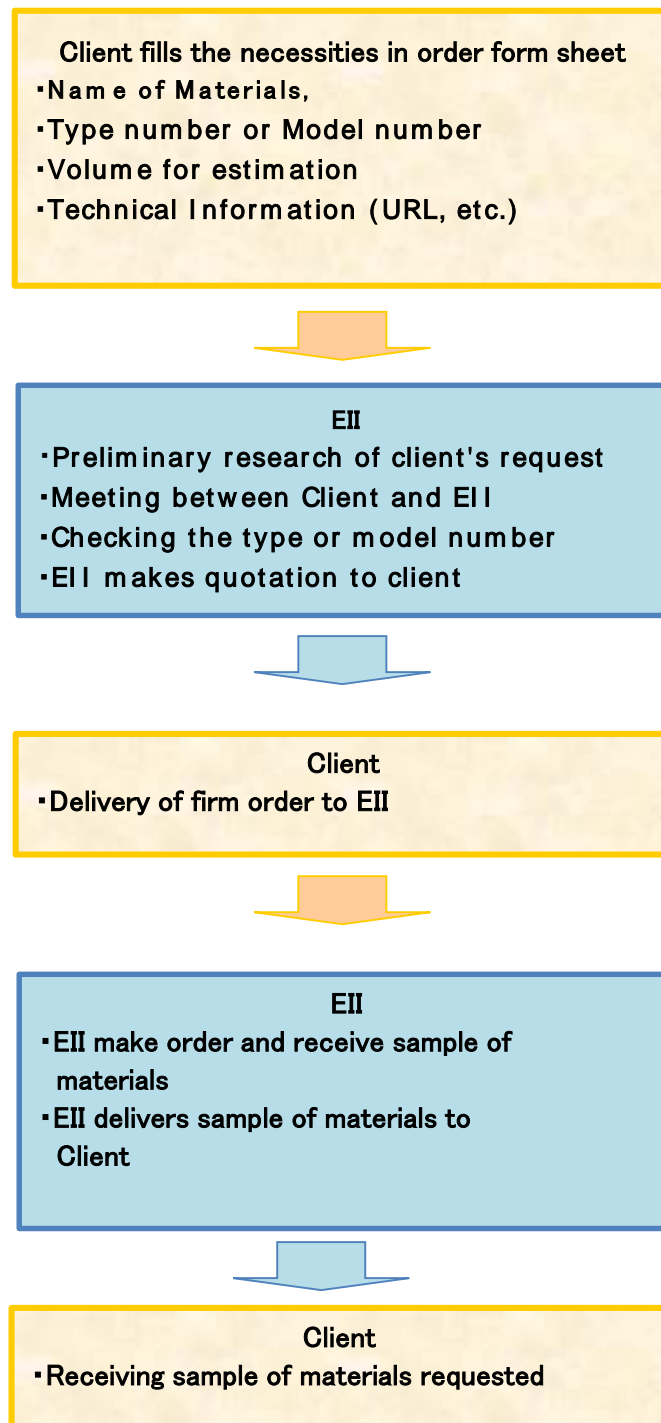

EII extended service network in overseas area to order sample materials.

EII extended service network in overseas area to order sample materials since August, 2010. It could be possible to shorten the delivery schedule of sample materials to clients by using EII's associates in overseas. EII recommends clients to try to use overseas service that arranges sample materials, in addition to domestic market.

II. Procedure of representative service that arranges sample materials

If clients are interested in EII's Representative service that arranges sample materials, and feel to try to use this service, please fill the necessities in the application form or e-mail contact sheet in the last part of the guide book, and send it to EII.
